ABOUT ME

Backend Developer with 1 year of hands-on experience building production-ready Node.js backends using Express and MongoDB. Skilled in designing RESTful APIs, JWT-based authentication, payment and third-party integrations, and optimizing database queries for performance. Volunteer instructor at Minia National University, mentoring students in backend fundamentals and practical projects. Strong problem-solver with experience in testing, CI/CD, and cross-functional collaboration, committed to continuous learning and delivering reliable solutions.

WORK EXPERIENCE

Star Maker website | Freelance | Minia **Oct 2024 - Present**

- Lead backend developer for the Star Maker project, building and maintaining the entire backend using Node.js.
- Designed and implemented RESTful APIs and database models to support core product features.
- Implemented authentication and authorization, integrated third-party APIs, and built background processing for long-running tasks.
- Authored unit and integration tests, performed debugging and performance optimizations to improve reliability and response times.
- Collaborated with frontend developers and stakeholders to deliver features on schedule and translate requirements into technical solutions.

E-commerce | Freelance | Freelance **Jan 2025 - Apr 2025**

- Developed backend CRUD operations for products, orders, customers and carts, implementing RESTful APIs and clear routing for scalable e-commerce workflows.
- Implemented robust error handling, input validation and centralized logging to speed troubleshooting and reduce production incidents.
- Integrated payment gateways and third-party services, handling webhooks and secure transactional flows.
- Optimized database queries and indexing to improve API response times and system reliability.
- Wrote unit and integration tests, participated in CI/CD deployment pipelines, and performed hands-on troubleshooting and root-cause analysis for production issues.
- Worked closely with frontend developers and QA to ensure smooth integrations and timely feature delivery.

EDUCATION

Bachelor of Technology | Minia national university | Minia **2027**

I am still studying at the university in the third year and I am achieving good successes. Every year I explain subjects to students as a volunteer work.

SEF Academy | Online **2026**

- Completed an intensive backend diploma focused on Node.js, Express, RESTful API design, MongoDB, authentication (JWT), testing, and deployment.
- Capstone project: implemented a production-ready e-commerce API with JWT authentication, payment integration, background job processing, and comprehensive unit/integration tests.
- Final grade: 97.8/100.
